

BAB PICKING TRAIN

Mostly a picking train is made with 4 trailers

These are all different , depending on there position in the train.

pos. art. nr.

1	110-001-001	front cart with drawbar with fork and jack
2	110-002-002	standard cart , if the number of carts changes , it will happen with this one .
3	110-003-003	this one must always be placed as the penultimate one and has a raised drawbar at the rear
4	110-004-004	it can only be placed at the rear , since it has no drawbar at the rear

- * platform height 21 cm
- * wheels behind bin
- * mudguard from left to right
- * wheels 18x9,50-8 6 ply
- * rim mounted on axle with 4 bolts
- * color green RAL 6018

- * bins 1,0 x 1,2 meter and 1,2 x 1,2 meter
- * total width 1 meter
- * width adjustable sides

The first cart has a connection for a drawbar and has a jack.

Most of the time a picking train is made out of 4 carts , but you can make it shorter or even longer.

A train made of 4 trailers has a total length of approximately 12 meters and is for 8 pickers.

price a piece when purchasing a full train

this price may differ when purchasing an individual cart,

option a piece when galvanised instead of painted
